NOMURA REAL ESTATE OFFICE FUND

Profile

Nomura Real Estate Office Fund, Inc. (referred to as “Nomura Office Fund”, “NOF” or the “Company” hereafter) was listed on the Tokyo Stock Exchange on December 4, 2003 as a real estate investment corporation formed to own and invest in office properties, subject to the Act on Investment Trusts and Investment Corporations of Japan. The Company’s basic investment policy is to assure stable rent revenues and steady portfolio growth over the medium-to-long-term.

Nomura Real Estate Asset Management Co., Ltd. (referred to as “NREAM” hereafter), a wholly owned subsidiary of Nomura Real Estate Holdings, Inc. is in charge of asset management on behalf of Nomura Office Fund in accordance with the basic investment policy as described above. Through coordination with Nomura Real Estate Holdings, Inc. and other group companies, NREAM aims to achieve these goals and more.

To Our Investors

Dear Investors,

I would like to thank all of you for your continuing trust in Nomura Real Estate Office Fund, Inc. and tell you how much we value being a part of your financial portfolio.

Closing of accounts for the 21st fiscal period, which ended April 30, 2014, showed the following results. For the period, NOF achieved operating revenues of 12,260 million yen, ordinary income of 3,630 million yen, and net income of 3,630 million yen. Dividends per share totaled 10,000 yen. Despite operation of the previous fiscal period's three newly-acquired properties entirely throughout the 21st fiscal period, operating revenues decreased due in part to penalty income, which was earned from some properties in the previous fiscal period, having decreased. There was decrease in real estate rental expenses (utility expenses, etc.), decrease in non-operating expenses (interest expense, new investment units' issuance costs, etc.), etc., but net income was 0.2% less than the previous fiscal period.

During the 21st fiscal period, with the acquisition of "Kojimachi Millennium Garden" (acquisition price: 26.5 billion yen), which is a prime property boasting a premium location in central Tokyo and high internal growth potential, in March 2014 by utilizing the acquisition capacity generated from the capital increase through public offering implemented in July 2013, NOF managed to achieve subsequent fiscal periods' buildup of property revenues and expansion of asset size, as well as strengthening of the portfolio. As a result, the period-end asset size was 54 properties amounting to 409.5 billion yen.

Concerning the office rental market, the vacancy rate for the five central wards of Tokyo gradually decreased to a level that at the end of April 2014 was 6.64% due to supply of newly-constructed buildings having settled down and increase in needs for expansion of floor space, etc. backed by improvement in corporate earnings. In addition, the rent is showing a trend toward improvement for four consecutive months to a level that at the end of April 2014 was an average rent of 16,455 yen per tsubo for said area.

Under these circumstances, we focused on maintaining and improving occupancy rate through early lease-up of vacant spaces with an accurate understanding of property features and market environment.

As a result, the portfolio occupancy rate at the end of the 21st period was 97.5%, maintaining stable management of the portfolio.

NOF continues prioritizing stable management over the mid- and long-term to respond to investor need for the building of high-quality assets in and after the next period.

Again, NOF is grateful for the trust you have placed in us and we look forward to continuing progress as we move together toward the future.

Yoshiyuki Ito
Executive Director
Nomura Real Estate Office Fund, Inc.

Note: NOF has acquired all investment properties identified in the table above in the form of trust beneficial interests, except Secom Medical Building, NRE Shibuya Dogenzaka Building, PMO Nihonbashi Honcho, NRE Higashi-nihonbashi Building, PMO Akihabara, PMO Hatchobori, PMO Nihonbashi Odenmachi, NOF Takanawa Building, PMO Higashi-nihonbashi, NRE Ueno Building, Toho Edogawabashi Building, Crystal Park Building, Yokohama Odori Koen Building, NRE Sapporo Building, JCB Sapporo Higashi Building, NOF Nagoya Fushimi Building, SORA Shin-Osaka 21 and NRE Nishi-Umeda Building in the form of real estates.

Note: "Abbreviations under "Type of Structure" indicate: S: Steel-frame, RC: Reinforced Concrete and SRC: Steel-frame Reinforced Concrete.

Note: According to the notice of confirmation issued in accordance with the Building Standards Act, the floor of NOF Sendai Aoba-dori Building is described as 8 floors above the ground and 3 floors of penthouse with 2 floors below ground."

Note: "Leasable Floor Space" includes office and retail floor space for investment properties as of a specified date. In principle, exclusive and designated areas acquired under strata (unit) title have been included. Leased common areas are also included. Leasable floor space for the Shinjuku Nomura Building is the space multiplied by NOF's share of trust beneficial interests acquired. According to the master lease agreement, the rent of NRE Tennozu Building is the rent of the entire building multiplied by percentage of the share of common area. Thus, its leasable floor space is the floor space of the entire building multiplied by the said percentage. Each Leasable Floor Space indicates as of April 30, 2014.

Note: "Completed" is a completed date of a building written on the title registration form. As for NOF Tameike Building, the date of completion is a date stated on the Certificate of Inspection in accordance with the provisions of article 7(3) of the Building Standards Act as there is no date stated on the title registration form.

Note: "% of Total" is the percentage of the total portfolio. The figures in the table above have been rounded to the nearest first decimal place. Accordingly, the total may not equal 100.0%

Note: NOF has acquired a trust beneficial interest in the Shinjuku Nomura Building. The acquisition price represents the cost of purchasing 50.1% of the trust beneficial interest.

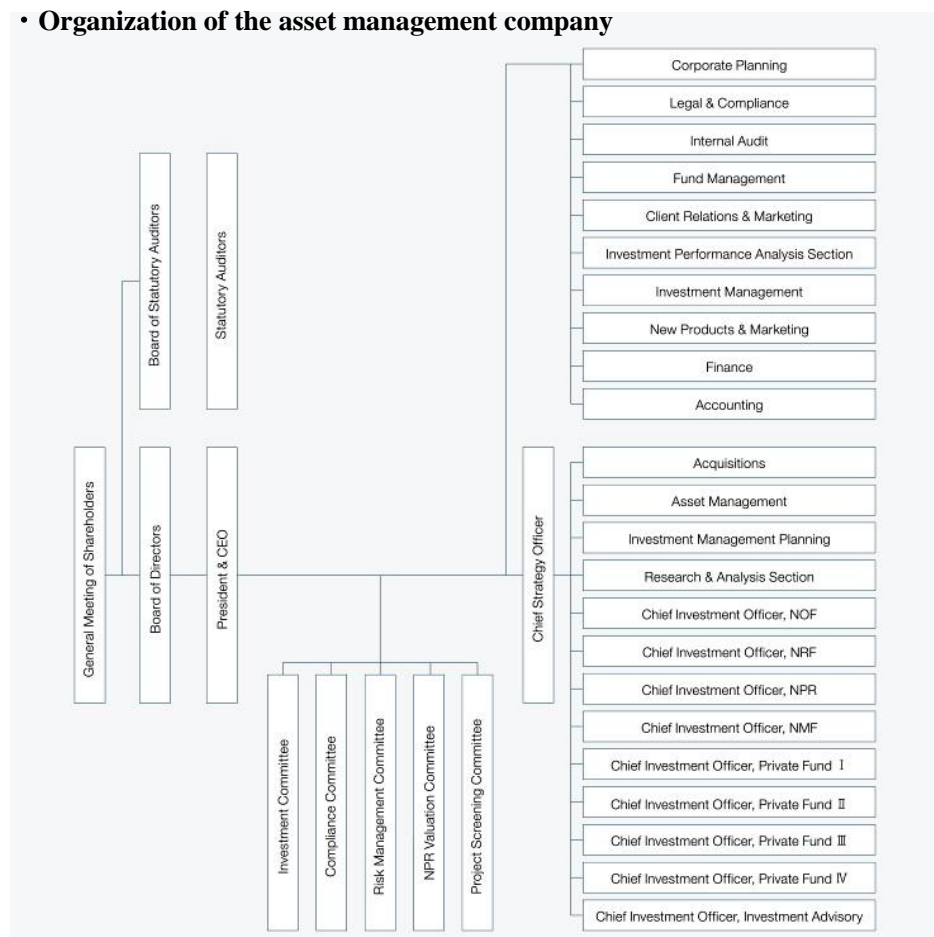

Note: NOF transferred a part of the land of NOF Technoport Kamata Center Building (co-owned area) on August 31, 2007. The acquisition price on the list is the amount subtracting a book price of the asset to be transferred (13 million yen) from the acquisition price before the transfer (6,430 million yen). The number of amount below unit is truncated.

Profile of the Asset Management Company

As of October 1, 2011, Nomura Real Estate Asset Management Co., Ltd. (NREAM) was merged with Nomura Real Estate Investment Management Co., Ltd. (NREIM) and Nomura Real Estate Capital Management Co., Ltd. (NRECM), with a change of its Japanese trade name from Nomura Fudosan Toshin to Nomura Fudosan Toshi Komon. We believe that the Company can benefit from various synergy effects from this merger including the ability to quickly respond to changes in the real estate and financial markets, the enhancement of expertise and experience necessary for real estate investment, and the ability to provide asset management services through one of the largest real estate asset management companies in Japan.

2. OUTLINE OF INVESTMENTS IN THE TWENTY-FIRST FISCAL PERIOD

Nomura Real Estate Office Fund, Inc., incorporated on August 7, 2003 under the Act on Investment Trusts and Investment Corporations of Japan, listed the unit certificates in the Real Estate Investment Trust (REIT) Market of the Tokyo Stock Exchange on December 4, 2003 (TSE code 8959). The Company's basic investment policy is to assure stable income from, and steady growth of, investment assets over the mid-to-long-term. In accordance with this policy, we invest in properties mostly for office use in three largest conurbations and other major cities, or in property-backed securities that are backed by such properties.

Note:

The Act on Investment Trusts and Investment Corporations of Japan (Act No. 198 of 1951) is referred to as the "Investment Trust Act" hereinafter.

The term "unit certificates" are the securities issued by the Company and may be referred to as "investment units" or "units" hereinafter.

The term "investment assets" refers to those assets that belong to the Company.

Unless otherwise stated, for the purpose of this report, the concept of "property(ies)" is construed to include leasehold and superficies.

The term "property(ies)" refers to those assets defined in Section 27, Paragraph 1, Article (1) and (2), and "property-backed securities"

refers to those assets defined in Section 27, Paragraph 1, Article (3) respectively of the Articles of Incorporation of the Company.

The terms "property(ies)" and "property-backed securities" are collectively referred to as "property-related assets" hereinafter.

The properties and underlying properties of the property-related assets are collectively referred to as the "investment properties".

(1) Operating Environment

The Japanese economy continued its moderate upswing as the effects of the government's fiscal policy and Bank of Japan's bold monetary easing rippled through the real economy. Personal consumption and housing investment remained strong amid improvement in the employment and income environment. Since the beginning of 2014, such factors as economic unrest in emerging markets, sense of uncertainty over the situation in Ukraine and concerns over slowdown in the Chinese economy have led to an unstable market environment. Nevertheless, with improvement in corporate earnings, along with pickup in capital investment, as well as increase in demand for reconstruction from the Great East Japan Earthquake and other public investment also continuing, the Japanese economy showed economic recovery led by domestic demand. According to Bank of Japan's Short-Term Economic Survey of Enterprises in Japan (Tankan) in April 2014, the business conditions diffusion index (DI) for enterprises of all sizes and all industries had improved by 4 points compared with the previous survey. Although temporary impact on the rebound of the last-minute surge in demand that had accompanied the consumption tax hike is likely, the moderate upswing is forecast to continue.

In this environment, backed by the now risk-on domestic and foreign investment funds inflow to the J-REIT market and other real estate markets, as well as the financing environment being favorable due to monetary easing, there is active acquisition of properties accompanying the initial public offering (IPO) of new J-REITs and public offering (PO) of existing J-REITs.

(a) Office Rental Market

In the office rental market, supply of newly-constructed buildings settled down. In addition, there was increase in needs for relocation for the purpose of new store opening, business expansion, responding to increase in personnel or better location/specifications, and needs for expansion of floor space within the same building backed by improvement in corporate earnings. These led to gradual improvement in the supply-demand balance, resulting in the vacancy rate for the five central wards of Tokyo gradually decreasing to a level that at the end of April 2014 was 6.64%. With such improvement in the supply-demand balance, rent levels also showed signs of increase, centering on large-sized prime properties. However, recovery of the market as a whole will likely take some more time yet.

(b) Real Estate Market

In the real estate market, the domestic and foreign investment funds inflow, the financing environment being favorable due to monetary easing, signs of rental market recovery, etc. led to active acquisition of properties, centering on J-REITs and other real estate funds and real estate companies. In central Tokyo, supply of prime properties is limited, cap rates are on a downward trend and transaction prices are on an upward trend.

(2) Status of Managements for the Twentieth Fiscal Period

Abiding by its basic policy of acquiring only properties that would generate stable returns over the mid-to-long-term, the Company continues to invest in and manage properties that offer outstanding competitiveness in terms of both location and basic building features, and stable cash flows.

During the 21st fiscal period, the Company acquired "Kojimachi Millennium Garden" (acquisition price: 26.5 billion yen) in March 2014 based on the policy described above, bringing the Company's total assets under management (referred to as "portfolio" hereinafter) as of the end of the 21st fiscal period (April 30, 2014) to 54 properties (total leasable floor space: 427,484.45 m²) totaling approximately 409.5 billion yen (total acquisition price).

Concerning property management, in spite of the rental market showing signs of recovery as described in "(1) Operating Environment," the gap between the market rent level and the portfolio rent level is yet to close, making the situation one that remains difficult. The Company places maintaining and improving the earning power and occupancy rate and systematic repair investment of existing properties as priority issues. In the 21st fiscal period, the Company promoted increasing the amount of certain newly-advertised rent, taking in existing tenants' needs for expansion of floor space within the same building and finding tenants for newly-advertised floor space. In addition, upon contract renewals, rent revision negotiations were conducted in an effort to minimize decline in the portfolio rent level, while taking the individual rental market into consideration. Furthermore, the Company systematically carried out renovation work on common areas as well as updating of equipment and other function maintenance work that would lead to improvement of tenant satisfaction.

As a result, the average portfolio occupancy rate as of the end of the 21st fiscal period was 1.1 points better than at the end of the previous fiscal period to achieve an impressive 97.5%. Stable real estate rental revenues are being secured through leasing activities and reduction of asset management expenses that make the most of the Nomura Real Estate Group's (Note) know-how.

Note: "Nomura Real Estate Group" refers to a corporate group consisting of the consolidated subsidiaries of Nomura Real Estate Holdings, Inc. (referred to as Nomura Real Estate Holdings hereinafter) including Nomura Real Estate Development Co., Ltd. (referred to as "NRED" hereinafter) but excluding Nomura Real Estate Asset Management Co., Ltd. (referred to as the Asset Management Company hereinafter).

(3) Status of Funding

Concerning funding through interest-bearing debts, the Company has the basic financial policy of funding through promotion

of long-term, diversified and fixed interest rate debts, for the purpose of securing financial stability and avoiding future interest rate risks. Based on this policy, the Company has implemented funding through long-term debts and issuance of investment corporation bonds, while establishing a total of ¥30 billion of commitment line for the purpose of flexible funding at the time of property acquisition and reduction of refinancing risks, from the perspective of securing stable funding base.

During the 21st fiscal period, the Company procured the funds to acquire “Kojimachi Millennium Garden” by newly borrowing 28.2 billion yen. In addition, the Company procured the funds to refinance existing debt of 16.0 billion yen, keeping in mind the efforts to make debt long-term rather than short-term debt and fixed-rate rather than floating-rate debt. As a result, the balance of interest-bearing debt at the end of the 21st fiscal period was 192.3 billion yen (of which 39.5 billion yen is for investment corporation bonds), setting loan-to-value (LTV) ratio at 44.2%.

The table below shows the credit ratings of the Company as of the end of the 21st fiscal period.

Rating Company	Rating	Outlook
Rating and Investment Information, Inc.	Issuer Rating A+	Stable
Standard & Poor's Ratings Japan K. K.	Long-term Corporate Credit Rating A-	Stable
	Short-term Corporate Credit Rating A-2

4. CASH DISTRIBUTION

As for the cash distribution for the 21st fiscal period, while planning for the maximum amount of distribution of earnings to be included in deductible expenses based on the application of a special provision of taxation (Special Taxation Measures Law (Act No. 26 of 1957) Article 67-15), the Company decided to distribute the entire amount of the sum of unappropriated retained earnings and reversal of reserves for reduction entry. As a result, the amount of cash distribution per unit for the 21st fiscal period was 10,000 yen.

5. INVESTMENT POLICY AND FUTURE ISSUES

(1) Investment Environments

As mentioned in “2. OUTLINE OF INVESTMENTS IN THE TWENTY-FIRST FISCAL PERIOD (1) Operating Environment”, the expectation of economic recovery has been growing along with the recovery of corporate performance backed by financial and other policies put in place by the national government and increasing consumer confidence. The J-REIT market also shows a tendency toward recovery based on financial inflow. Against this background, the office rental market shows signs of recovery through the recovery of floor demand and an easing of the pressure from corporations for reduced rents, which shows that the office rental market is in a transitional period preparing to hit bottom and turn around.

Under such circumstances, it is important to continue flexible property management based on an accurate understanding of tenant needs, prepare for the market recovery phase while focusing on minimizing deterioration in portfolio profitability, maintain and improve the ability to procure funds through conservative financial management, and keep a sharp eye on the movement of anticipated yields and liquidity in the real estate market.

(2) Asset Management Policy and Future Issues

With such environments in mind, the Company will employ the following asset management policies to ensure stable income from, and steady growth of the portfolio over the mid-to-long-term.

(a) Property Management in a Mid-to-Long-Term View

In addition to enhancement of property management to satisfy the requirements of existing tenants to enhance the relationship, and keep their evacuation at low level, proper recognition of the property features and leasing market environments will help us market the potential tenants from in and outside of the properties for existing and future vacant space. Thus we will maintain and uplift the occupancy rate and level of rents in pursuit of sustainable and improved profitability of portfolio, namely internal growth of portfolio.

In order to ensure stable revenues over the mid-to-long-term, we will carry out strategic refurbishment and renovation works to maintain and/or improve features of the properties, establishing their uniqueness and increasing their competitiveness.

(b) Enlargement of Portfolio by Acquisition of New Properties

The Company has set in motion several strategic measures; that is, targeting the expansion of asset size up to ¥500 billion in the medium term in order to achieve higher revenue (i.e. external growth); replacing our property portfolio to enhance its quality; ensuring the portfolio is well-balanced and diversified to minimize fluctuation risks in revenue; and maximizing the advantage of scale to reduce operational and administration costs.

In order to make right investments in properties of good value, we will ensure to collect information on properties for sale in an early stage, and conduct an in-depth due diligence to assess the potential risks involved in such investments. As part of our efforts to carry out this investment policy, we will work to find investment opportunities through further expansion of our own sourcing network as well as cooperation with other companies of Nomura Real Estate Group, and to make appropriate investment decisions based on our market research capabilities and technical expertise.

In making an investment decision, we adhere to strict criteria to select best properties that can bring stable revenues to the entire portfolio in light of mid- and long-term perspectives.

(c) Continuation of Conservative Financial Policy

In order to assure stable financing capability and increase creditworthiness in the market over the mid-to-long-term, we will pay particular attention to debt finance. We will seek to continuously keep the LTV low by using more long-term funding at fixed-rates, fixing the rate by using interest rate swap transactions or other methods, diversifying the repayment dates, and increasing the number of institutions we bank with.

We will closely monitor the conditions of financial markets, and carefully deliberate and choose the best means of funding, including the usage of commitment lines, issuance of investment corporation bonds and short-term investment corporation bonds from a wide range of available sources of funding to ensure a well-balanced structure of interest-bearing debts.

Total	208,781	185,021.80	181,024.14	97.8	47.0 (Note 6)	

Note 1: "Leasable Floor Space" refers to the total leasable space for each asset including offices, shops and residence (for properties owned in compartments, this generally refers to exclusively owned area; however, common spaces will be included if they are being leased. For Shinjuku Nomura Building, the area calculated by multiplying the overall leasable floor space by the quasi co-ownership ratio of the beneficial interest in real estate trust owned by the Company. For NRE Tennozu Building, includes the area calculated by multiplying the overall common space by the co-ownership ratio for the common spaces prescribed in the terms of management of the building owned by the Company through the trustee.), at a certain time. Leasable floor space is calculated not based on the total floor space stated on the registry book, but based on the area stated on the building completion drawing, etc. included in the lease agreement. As such, it may differ from and exceed the total floor space stated on the registry book.

Note 2: "Leased Space" refers to the area included in the leasable floor space of each asset and is actually leased based on a lease agreement (provided, however, it is limited to office, shops and residence (where the entire leased floor space is being leased as a whole, the total area of the leased floor space.), and does not include leased parking spaces. For Shinjuku Nomura Building, the area calculated by multiplying the overall leased space by the quasi co-ownership ratio of the beneficial interest in real estate trust owned by the Company. For NRE Tennozu Building, includes the area calculated by multiplying the overall common space by the co-ownership ratio for the common spaces (as prescribed in the terms of management of the building) owned by the Company through the trustee.).

Note 3: Not disclosed due to compelling reasons.

Note 4: Although this property comprises an office section and a residential section, its primary use is office. The Company's Articles of Incorporation, etc. allow the Company to invest in also property-related assets that have office as the primary use. The primary use is indicated as "office" in the above table with this understanding.

Note 5: Although this property is currently registered as "clinic/parking" on the registry book, it was originally designed to be used as offices. The Company's Articles of Incorporation, etc. allow the Company to invest in non-office property-related assets given that they can easily be converted into offices. The use is indicated as "office" in the above table with this understanding.

Note 6: "Total" for "Portion of Rental Revenues" column include rental revenues for properties which do not disclose "Portion of Rental Revenues" due to unavoidable reasons.

Note 1: "Appraisal Value as of Apr. 30, 2014" stands for the prices appraised by the estate surveyors in accordance with the provisions of the Company's Articles of Incorporation and the "Rules Concerning Calculations of Investment Corporations" (Cabinet Office Ordinance No. 47 of 2006). The appraisal prices are calculated by Japan Real Estate Institute, The Tanizawa Sogo Appraisal Co., Ltd., Daiwa Real Estate Appraisal, Co., Ltd., Japan Valuers Co., Ltd., Appraisal Firm A-Square, Ltd., or Morii Appraisal & Investment Consulting Inc. using the capitalization approach, with the end of the Twentieth Fiscal Period, i.e. April 30, 2014, being taken as the point of evaluation.

Note 2: "Book Value" stands for the aggregate purchase price of lands, buildings, structures, machinery and equipments, tools and fixtures, leased assets, construction in progress, and leaseholds owned directly or held in trust, less depreciation including expenses associated with these purchases.

Note 3: The Company's stake in this property is quasi co-ownership of 50.1% of entirety. The appraisal value and book value as of April 30, 2014 accounted solely for the quasi co-ownership.

Note 4: Residential indication of the property is not available yet.

Note 1: In the case a master lease agreement is in place, in which the master tenant of the said lease agreement subleases a part or whole of the leased floor spaces to the end tenants, only the master tenant is counted as the number of tenants. For NRE Tennozu Building and PMO Nihonbashi Honcho, PMO Akihabara, PMO Hatchobori, PMO Nihonbashi Odenmachi, and PMO Higashi-nihonbashi, which involves a “pass-through type” master lease agreement where the amount of rent received from the master tenant is the same as the rent received by said master tenant from the end tenant, the total number of end tenants is shown. In the case more than one space within the same building are leased by the same tenant, such spaces are combined to count for just one tenant. However, when the same tenant leased floor spaces in more than one building, such spaces are counted separately for each building as if they are leased by different tenants. As for Shinjuku Nomura Building and NOF Toyo-cho Building, the number of tenants in the entire building is taken into account. For Kojimachi Millennium Garden, the number of tenants is the number of tenants in the entire building, calculated by counting the master tenant as the number of tenants in the residence section because there is a master lease agreement in place, in which the master tenant of the said lease agreement subleases a part or whole of the leased floor spaces to the end tenants, and then adding to this one tenant count the total number of end tenants in the office section.

Note 2: Not disclosed due to compelling reasons.

Note 3: Subtotals of “Rental Revenues” and “Portion of Rental Revenues” for each area are not disclosed due to compelling reasons.

Note 4: Kojimachi Millennium Garden was acquired on March 28, 2014, and “Real Estate Rental Revenues” for the 21st fiscal period is the amount after the acquisition date.

Note 5: Grand total of “Rental Revenues” is including the amounts which are not disclosed due to compelling reasons.

4. OUTSTANDING AMOUNT AND CURRENT PRICE OF SPECIFIED TRANSACTIONS

The outstanding amount and current price of the specified transactions as of April 30, 2014 are as follows.

Segment	Type of Transaction	Contract Amount (¥ mln) (Note1)		Current Price (¥ mln) (Note2)
		Longer than a Year		
Transaction other than market transaction	Interest-rate swap (Receiving floating-rate, paying fixed-rate)	94,580	76,230	▲690
	Total	94,580	76,230	▲690

Note 1: Presented based on notional principal of contract.

Note 2: Evaluated at the price provided by the counterparty based on the prevailing market rate.

5. STATUS OF THE OTHER ASSETS

Other than the Trust Beneficial Interest and Real Estate listed in the table under the title “3. Details of Portfolio Properties”, the Company had no other assets to integrate into the portfolio as of April 30, 2014.

6. STATUS OF ASSETS BY COUNTRY AND REGION

The Company had no assets in countries or regions outside Japan.

Capital Expenditures

1. PLAN OF CAPITAL EXPENDITURES

The table below lists major capital expenditures in conjunction with the refurbishment and/or renewal works scheduled for the future (finished in part) on the properties held as of April 30, 2014. The estimated cost of works includes the amount to be charged as “expenses” for accounting purposes.

Name of Property (Location)	Description of Works (Purpose)	Estimated Period	Estimated Cost (¥ mln)		
			Total	Paid during 21st Period	Paid before 21st Period
Shinjuku Nomura Bldg. (Shinjuku-ku, Tokyo)	Renovation of extra-high substation equipment (To increase quality) (Note 1)	From: Feb. 2011 To: Mar. 2017	460 (Note 2)	4	278
NRE Ueno Bldg. (Taito-ku, Tokyo)	Repair work for air conditioning system (To increase quality) (Note 1)	From: Nov. 2013 To: Dec. 2014	216	-	-

Notes to Financial Statements

1. ORGANIZATION

Nomura Real Estate Office Fund, Inc. (the “Company”) is a real estate investment corporation formed to own and invest primarily in office properties. The Company is externally managed by a licensed asset management company, Nomura Real Estate Asset Management Co., Ltd. (“NREAM”). NREAM is a wholly-owned subsidiary of Nomura Real Estate Holdings, Inc.

On August 7, 2003, the Company was incorporated under the Act on Investment Trusts and Investment Corporations (the “Investment Trust Act”) of Japan. On December 4, 2003, the Company was listed on the Tokyo Stock Exchange as the 9th J-REIT and started operations on the following day. As of April 30, 2014, the Company owned a portfolio of 54 office properties containing an aggregate of approximately 427,484.45 square meters of leasable area and leased office space to 832 tenants.

2. BASIS OF PRESENTATION

The Company maintains its accounting records and prepares its financial statements in accordance with accounting principles generally accepted in Japan (“Japanese GAAP”), including provisions set forth in the Financial Instruments and Exchange Act of Japan, the Investment Trust Act of Japan and related regulations, which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards.

The accompanying financial statements are a translation of the audited financial statements of the Company, which were prepared in accordance with Japanese GAAP and were presented in the Securities Report of the Company filed with the Kanto Local Finance Bureau. In preparing the accompanying financial statements, certain reclassifications and modifications have been made to the financial statements issued domestically in order to present them in a format that is more familiar to readers outside Japan. In addition, the notes to financial statements include certain information that might not be required under Japanese GAAP but is presented herein as additional information. Amounts have been rounded to the nearest thousand of yen in the accompanying financial statements and the notes thereto, whereas amounts were truncated in the Japanese financial statements prepared in accordance with Japanese GAAP.

The Company’s fiscal period is a six-month period which ends at the end of April or October. The Company does not prepare consolidated financial statements because it has no subsidiaries.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Cash and cash equivalents

Cash and cash equivalents consist of cash on hand, deposits placed with banks and short-term investments that are highly liquid, readily convertible to cash, with an insignificant risk of market value fluctuation, and with a maturity of three months or less when purchased.

Property and equipment (Except for leased assets)

Property and equipment are stated at cost, which includes the purchase price and related costs for acquisition, less accumulated depreciation. Depreciation is calculated by the straight-line method over the estimated useful lives of the fixed assets outlined below:

Buildings	3 - 70 years
Structures	2 - 45 years
Machinery and equipment	3 - 15 years
Tools, furniture and fixtures	3 - 18 years

Intangible assets (Except for leased assets)

Intangible assets are amortized by the straight-line method.

Leased assets

Depreciation of leased assets under finance lease transactions, excluding those in which the ownership of the leased assets is deemed to be transferred to the lessee, is calculated by the straight-line method, over the lease term with no residual value.

Impairment of fixed assets

The Company reviews fixed assets for impairment whenever events or changes in circumstances indicate that the carrying value of its fixed assets may not be recoverable. An impairment loss is recognized if the carrying value of an asset exceeds the aggregate estimated future cash flows. If a fixed asset is determined to be impaired, it is written down to its recoverable amount and the write-down is recorded as an impairment loss during the period in which it occurs. No impairment losses have been recognized to date.

Deferred investment corporation bond issuance costs

Deferred investment corporation bond issuance costs are amortized by the straight-line method over the respective terms of the bonds.

Accounting treatment of beneficial interests in real estate

All assets and liabilities held in trust, for which the real estate in possession of the Company was entrusted, and all related earnings and expenses incurred are reflected in the accompanying balance sheet and statement of income and retained earnings, respectively.

Revenue recognition

Operating revenues consist of rental revenues including base rents and common area charges, and other operating revenues including utility charge reimbursements, parking space rental revenues and other income. Rental revenues are generally recognized on an accrual basis over the life of each lease. Utility charge reimbursements are recognized when earned and their amounts are reasonably estimated.

Property related taxes

Property in Japan is subject to property, urban planning and depreciable asset taxes on a calendar year basis. The taxes related to property are generally imposed based on the value of the relevant property and incurred for fiscal period.

The seller of a property is liable for property related taxes for the period from the purchase date through the end of that calendar year because taxes are imposed on the owner registered in the record as of January 1 for the entire year based on the assessment made by the local government. The amount applicable to the buyer of a property is usually settled between each party and capitalized as part of the acquisition cost of the property. The capitalized property related taxes amounted to ¥114,306 thousand and ¥22,677 thousand for the six-month period ended April 30, 2014 and October 31, 2013.

Income taxes

Deferred tax assets and liabilities are computed based on the differences between the financial statements and income tax bases of assets and liabilities using the applicable statutory tax rates.

Consumption taxes

Consumption taxes received and paid are not included in the accompanying statement of income and retained earnings.

Derivative financial instruments

The Company utilizes interest-rate swap contracts as derivative financial instruments only for the purpose of hedging its exposure to changes in interest rates. The Company defers recognition of gains or losses resulting from changes in the fair value of interest-rate swap contracts which meet the criteria for deferred hedge accounting.

Although the deferred hedge treatment is generally applied, the Company applies special treatment to those interest-rate swap contracts that meet the criteria for such special treatment. Under the special treatment, interest-rate swaps are not remeasured at fair value; instead, the net amount paid or received under the interest rate swap contract is recognized and included in interest expense or income.

Note 1: The weighted-average interest rate is weighted by the balance of each borrowing at the end of the period and rounded to the nearest fifth decimal place. As for the borrowings, which were hedged by interest-rate swaps for the purpose of avoiding interest rate fluctuation risk, the swapped interest rates are used to calculate the weighted average of interest.

Note 2: Installments of ¥250 million will be made on the 25th day of every sixth month starting on December 25, 2009, with the remaining payment of ¥6,750 million to be repaid on June 25, 2016.

The Company entered into ¥30,000 million credit facilities in the form of commitment lines with five financial institutions for the six-month periods ended April 30, 2014 and October 31, 2013. The total unused amounts of such credit facilities were ¥30,000 million as of April 30, 2014 and October 31, 2013.

Note 1: The weighted-average interest rate is weighted by the balance of each borrowing at the end of the period and rounded to the nearest fifth decimal place. As for the borrowings, which were hedged by interest-rate swaps for the purpose of avoiding interest rate fluctuation risk, the swapped interest rates are used to calculate the weighted average of interest.

Note 2: Installments of ¥250 million will be made on the 25th of every sixth month starting on December 25, 2009, with the remaining payment of ¥6,750 million to be repaid on June 25, 2016.

The scheduled repayment amounts of long-term debt for each of the five years after the balance sheet date (excluding the current portion of long-term debt) are as follows.

9. UNITHOLDERS' EQUITY

The Company issues only non-par value investment units in accordance with the Investment Trust Act. The entire amount of the issue price of new units is designated as stated capital. The Company is required to maintain net assets of at least ¥50,000 thousand as set forth in the Investment Trust Act.

10. PER UNIT INFORMATION

The net asset values per unit and the net income per unit as of April 30, 2014 and October 31, 2013 were as follows:

	For the period from November 1, 2013 to April 30, 2014	For the period from May 1, 2013 to October 31, 2013
Net asset values per unit	¥577,932	¥578,188
Net income per unit	¥9,744	¥10,414

The net income per unit is calculated by dividing net income by the weighted-average number of units outstanding for the respective six-month period.

Note: The basis for calculating net income per unit is as follows.

	For the period from November 1, 2013 to April 30, 2014	For the period from May 1, 2013 to October 31, 2013
Net income (Thousands of Yen)	¥3,630,009	¥3,635,930

12. INCOME TAXES

The Company, as an investment corporation, is subject to corporate income taxes at a statutory tax rate of approximately 37% for the six-month periods ended April 30, 2014 and October 31, 2013. However, the Company may deduct dividend distributions paid to its unitholders from its taxable income amounts, provided such distributions meet the requirements under the Act on Special Measures Concerning Taxation of Japan. Under this act, an investment corporation must meet a number of tax requirements, including a requirement to distribute in excess of 90% of its distributable income for the fiscal period, in order to deduct such amounts. If the investment corporation does not satisfy all of the requirements, the entire taxable income of the investment corporation will be subject to regular corporate income taxes.

Since the Company distributed in excess of 90% of its distributable income in the form of cash distributions totaling ¥3,725,530 thousand for the six-month periods ended April 30, 2014 and October 31, 2013, respectively, such distributions were treated as deductible distributions for purposes of corporate income taxes. The following summarizes the significant differences between the statutory tax rate and the effective tax rate:

	For the period from November 1, 2013 to April 30, 2014	For the period from May 1, 2013 to October 31, 2013
Statutory tax rate	36.59%	36.59%
Deductible cash distributions	(37.54)	(37.48)
Other	0.98	0.91
Effective tax rate	0.03%	0.02%

13. FINANCIAL INSTRUMENTS

Overview

(1) Policy for Financial Instruments

Upon acquisition of property-related assets, the Company may raise funds through certain financing methods including borrowings, issuance of investment corporation bonds including short-term investment corporation bonds (“investment corporation bonds”), and issuance of investment units. In financing through interest-bearing debt, to secure stable financing capability and reduce future risks of rising interest rates, the Company’s investment policy is to secure longer-term, fixed-rate borrowings with well-diversified maturities.

The Company enters into derivative transactions only for the purpose of reducing risk of future interest rate fluctuations and does not engage in speculative transactions.

(2) Type and Risk of Financial Instruments and Related Risk Management

Debts and investment corporation bonds are primarily used to fund the acquisition of property-related assets as well as the repayment of debts and redemption of investment corporation bonds. The Company is exposed to liquidity risk of being unable to meet its obligations on scheduled due dates. The Company controls and limits such risk by diversifying not only the financial institutions, but also the type of financing to include the effective use of surplus funds and direct financing from the capital markets such as issuance of investment units. In addition, the Company is exposed to the market risk arising from fluctuations in interest rates on its floating-rate debts. However, the effect of such risk on the operation of the Company is limited by maintaining the LTV ratio at low levels and the ratio of long-term fixed-rate debts to total debt at high levels. Furthermore, the Company may utilize derivative transactions (interest-rate swap transactions) as a hedging instrument to reduce the market risk under floating-rate debts by swapping such floating-rate interest payments for fixed-rate interest payments.

Bank deposits are held as a means of investing surplus funds, and the Company is exposed to the credit risk that financial institutions may default. However, the effect of such risk is limited by diversifying the financial institutions with which surplus funds are deposited.

Security deposits represent funds deposited by tenants, and the Company is exposed to the risk of returning deposits in the event that a tenant terminates the lease contract. However, the effect of such risk is limited by reserving sufficient funds to allow the Company to meet the obligation to return such deposits.

(3) Supplementary Explanation on Estimated Fair Value of Financial Instruments

The fair value of financial instruments is based on the quoted market price, if applicable. When there is no quoted market price available, fair value is reasonably estimated. Certain assumptions are used for the estimation of fair value. Accordingly, the result of such estimation may change if different assumptions are used. Furthermore, the contractual amounts of derivative transactions stated in “18. Derivatives and Hedge Accounting” below do not represent the market risk involved in these derivative transactions.

Fair Value of Financial Instruments

For the period from November 1, 2013 to April 30, 2014

The following table summarizes the carrying value and the estimated fair values of financial instruments as of April 30, 2014. The following table does not include financial instruments whose fair value is extremely difficult to estimate (see Note 3 below).

For the period from May 1, 2013 to October 31, 2013

The following table summarizes the carrying value and the estimated fair values of financial instruments as of October 31, 2013. The following table does not include financial instruments whose fair value is extremely difficult to estimate (see Note 3 below).

	Thousands of Yen		
	Carrying value (Note 1)	Fair value (Note 1)	Difference

(vi) Derivative transactions	-	-	-

Note 1: The numbers in parenthesis indicate liabilities.

Note 2: Method for determining the fair value of financial instruments and derivative transactions

(i) Cash and bank deposits and (ii) Cash and bank deposits in trust

As these items are settled within a short-term period, their fair value is nearly equal to the carrying value. Therefore, for these items, the carrying value is reported as the fair value.

(iii) Current portion of investment corporation bonds (v) Investment corporation bonds

The fair value of investment corporation bonds issued by the Company is determined based on their market prices.

(iv) Current portion of long-term debt and (vi) Long-term debt

For floating-rate long-term debt, the carrying value is reported as it is considered to be approximately equal to the fair value because such debt reflects the market interest rates within a short-term period. (However, the fair value of certain floating-rate long-term debt that qualifies for the special treatment of interest-rate swaps (see "18. Derivatives and Hedge Accounting") is determined by discounting the sum of its principal and interest payments net of any cash flows from the interest-rate swap at a rate reasonably estimated to be applicable to similar fixed-rate debt.) The fair value of fixed-rate long-term debt is determined by discounting the sum of its principal and interest payments at a rate reasonably estimated to be applicable to similar fixed-rate debt.

(vii) Derivative transactions

See "18. Derivatives and Hedge Accounting."

Note 3: The fair value of security deposits (with a carrying value of ¥6,802,594 thousand as of April 30, 2014 and ¥4,176,226 thousand as of October 31, 2013) and security deposits in trust (with a carrying value of ¥15,835,771 thousand as of April 30, 2014 and ¥15,712,681 thousand as of October 31, 2013) that have been deposited from tenants under lease contracts are not disclosed because they do not have any market price and their effective deposit period from the lease inception to tenant's termination of the lease contract cannot be reliably determined, thus making it impossible to reasonably estimate their future cash flows, and therefore, it is considered to be extremely difficult to estimate their fair value.

14. INVESTMENT AND RENTAL PROPERTIES

The Company owns in its portfolio certain office buildings (including land) for lease located in Tokyo and other areas. The following table summarizes the carrying value and the estimated fair value of these properties.

	Thousands of Yen	
	For the period from November 1, 2013 to April 30, 2014	For the period from May 1, 2013 to October 31, 2013
Carrying value		
Balance at beginning of period	¥375,744,268	¥365,302,697
Change during period	27,057,292	10,441,571
Balance at end of period	402,801,560	375,744,268
Fair value	¥350,054,000	¥324,084,000

Note 1: The carrying value represents the acquisition cost less accumulated depreciation.

Note 2: The major increase in the carrying value during the period ended April 30, 2014 and October 31, 2013 was mainly due to the acquisitions of Kojimachi Milenium garden (¥27,604,599 thousand) and PMO Nihonbashi Odenmachi (¥2,111,819 thousand), Otemachi Tatemono Gotanda Building (¥4,238,394 thousand) and NF Hongo Building (¥4,716,622 thousand).

Note 3: The fair value as of April 30, 2014 and October 31, 2013 represents the sum of the appraisal values estimated by external real estate appraisers.

The real estate rental revenues and expenses for the six-month period ended April 30, 2014 and October 31, 2013 are presented in “16. Breakdown of Real Estate Rental Revenues and Expenses.”

15. SEGMENT INFORMATION

For the periods from November 1, 2013 to April 30, 2014 and from May 1, 2013 to October 31, 2013

Segment Information

Since the Company has been engaged in the real estate leasing business as a single segment, segment information has been omitted.

Related Information

1. Information about products and services

Since revenues from external customers of products and services within a single segment are more than 90 percent of total operating revenues, information about products and services has been omitted.

2. Information about geographical areas

(1) Revenues

Since more than 90 percent of the total operating revenues were generated from external customers in Japan, geographical breakdown of revenues has been omitted.

(2) Property and equipment

Since more than 90 percent of the total property and equipment on the balance sheet are located in Japan, geographical breakdown of property and equipment has been omitted.

3. Information about major clients

Since no single external client represents 10 percent or more of the Company's total operating revenues, information about major clients has been omitted.

16. BREAKDOWN OF REAL ESTATE RENTAL REVENUES AND EXPENSES

Real estate rental revenues and expenses for the six-month periods ended April 30, 2014 and October 31, 2013 consist of the following:

	Thousands of Yen	
	For the period from November 1, 2013 to April 30, 2014	For the period from May 1, 2013 to October 31, 2013
Real estate rental revenues	¥12,260,051	¥12,378,168
Rental revenues	11,044,181	10,898,221

Other rental expenses	300,783	293,807
Real estate rental profits	¥6,278,780	¥6,297,667

17. LEASES

Finance lease agreements, excluding those in which the ownership of the leased assets is deemed to be transferred to the lessee, are mainly for tools, furniture and fixtures in trust. Depreciation of leased assets under finance lease transactions excluding those in which the ownership of the leased assets is deemed to be transferred to the lessee are calculated by the straight-line method, over the lease period with no residual value.

The Company, as a lessor, enters into lease agreements for which fixed monthly rents are due in advance with a lease term of generally two years for offices. The future minimum rental revenues under existing non-cancelable operating lease agreements as of April 30, 2014 and October 31, 2013 are summarized as follows:

	Thousands of Yen	
	As of April 30, 2014	As of October 31, 2013
Due within one year	¥4,737,705	¥4,670,568

Total	¥18,057,928	¥19,913,544

18. DERIVATIVES AND HEDGE ACCOUNTING

Derivative transactions as of April 30, 2014

- (1) There were no derivative financial instruments not applying hedge accounting.
- (2) Derivative financial instruments applying hedge accounting were as follows:

Hedge accounting method	Type of derivative instruments	Main hedged item	Notional amount		Fair value	Method used for determining fair value
			Due after one year			
Special treatment of interest-rate swaps	Interest-rate swaps: Received/floating and paid/fixed	Long-term debt	94,580,000	76,230,000	(*)	/

* Since the derivative financial instruments qualifying for the special treatment of interest-rate swaps are accounted for as one transaction together with their hedged item, long-term debt, the fair value of these derivatives is included in that of related long-term debt (see “13. Financial Instruments (Note 2) (iv) Current portion of long-term debt and (vi) Long-term debt”).

Derivative transactions as of October 31, 2013

- (1) There were no derivative financial instruments not applying hedge accounting.

Special treatment of interest-rate swaps	Interest-rate swaps: Received/floating and paid/fixed	Long-term debt	74,850,000	58,350,000	(*)	/

* Since the derivative financial instruments qualifying for the special treatment of interest-rate swaps are accounted for as one transaction together with their hedged item, long-term debt, the fair value of these derivatives is included in that of related long-term debt (see “13. Financial Instruments (Note 2) (iii) Current portion of long-term debt and (v) Long-term debt”).

Independent Auditor's Report

The Board of Directors
Nomura Real Estate Office Fund, Inc.

We have audited the accompanying financial statements of Nomura Real Estate Office Fund, Inc., which comprise the balance sheet as at April 30, 2014, and the statements of income and retained earnings, changes in net assets, and cash flows for the six-month period then ended and a summary of significant accounting policies and other explanatory information, all expressed in Japanese yen.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in Japan, and for designing and operating such internal control as management determines is necessary to enable the preparation and fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. The purpose of an audit of the financial statements is not to express an opinion on the effectiveness of the entity's internal control, but in making these risk assessments the auditor considers internal controls relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

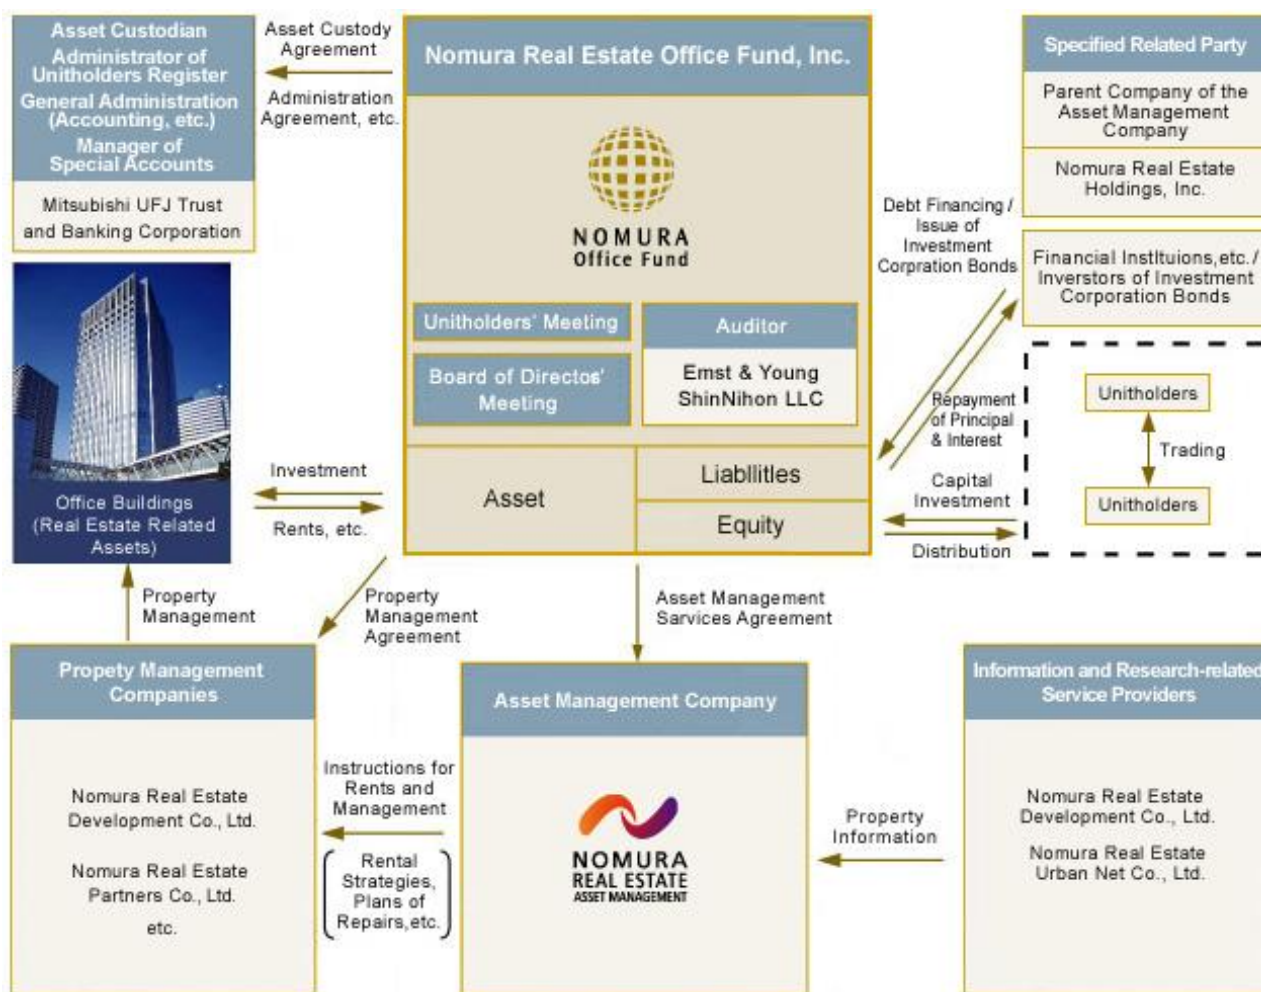

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Nomura Real Estate Office Fund, Inc. as at April 30, 2014, and its financial performance and cash flows for the six-month period then ended in conformity with accounting principles generally accepted in Japan.
